

PRODUCT PORTFOLIO

Access & Security

RFID transponders for personal identity authentication

Overview

Sokymat's Access and Security division develops and manufactures a wide range of transponders especially designed for access control and security applications. The portfolio of RFID transponders includes different kinds of tags manufactured with various types of packaging solutions. It consists of cards, clamshell cards, and key fobs and labels, featuring the most widely used RFID Integrated Circuits, such as **Q5**, a free protocol IC which can be programmed to fit all access control applications on the market.

Applications

- Building access control
- Domestic door locks
- Customer loyalty programs
- Ticketing for recreational venues
- Time & attendance
- Ski lifts & ticketing systems

Sokymat's expert development team can provide customized products that comply with the specific needs of each individual customer, starting from the definition of specifications, to development of the product, fabrication of the prototype and proceeding with volume production.

Headquartered in Granges, Switzerland, Sokymat is the world's leading manufacturer of radio frequency identification (RFID) transponders, offering the broadest range of tags available on the market today. Thanks to its unique know-how in packaging technology, the company is capable of designing and manufacturing virtually any type of custom transponder solution, suited to the specific operating environment and packaging material requested by the customer - including metal.
